

Always on call and always up to speed.

Marine electronics services designed to help you keep your vessels on the move and your vessels sailing safely and effectively whatever your business

Communications and navigational tools are expected to work in harsh conditions day in day out. Unfortunately, and despite careful design and manufacturing, marine electronics, the vital tools of your trade, do from time to time fail.

Hence, our focus on being able to provide the engineering skills and spare parts on a 24/7, 365 days a year on a one-call solves all basis.

That single call or email starts the ball rolling, identifying the possible fault or part needed, sourcing the item and getting it fixed promptly, so that you avoid downtime and with no compromise on safety.

An Expanding Network

Our network expansion of marine electronics service bases has started in earnest with the addition of Liverpool and Tyne Tees.

And there is more to follow to help maintain and support ships' marine electronics, in key ports around the UK.

Repairs and Spares for almost all makes and types of marine electronics, navigational, communications and safety equipment

Qualified & Highly Skilled

Charity & Taylor fully trained Engineers are qualified with global accreditation and receive regular updates as well as training on current equipment upgrades and changes in regulations.

Everything You Need

We source and supply spares and equipment worldwide from all major manufacturers. And as part of the Aage Hempel Group we have access to stock of over €3.5 million of spares and equipment at key ports around the world, which are constantly updated to closely match current market trends.

Total, Dedicated Support

One call or email to our support team gets things rolling and gives you our undivided attention. Their job is to identify the fault and find the remedy. Know how and training as well as direct experience of maritime businesses gives you help and our total support.

GMDSS Radio Surveys

Annual GMDSS Radio & APT Surveys play a vital role in maintaining safety at sea. Surveys, inspections and checks significantly reduce emergencies and can help greatly toward uninterrupted operational capacity.

Careful inspection of marine electronics equipment is a key service we provide to ensure vessel's navigational safety and compliance.

Inspections are carried out by Charity & Taylor engineers who are authorised by the MCA as Shore Based Maintainers and by all major Classification Societies to carry out annual GMDSS radio surveys on their behalf.

VDR Annual Performance Tests

We are also qualified in Annual Performance Tests (APTs) for Furuno, JRC and Danelec VDR/SVDR equipment and to carry out annual tests for AIS, SSAS and LRIT equipment.

Charity & Taylor
Customer Powered. Quality Driven.
